## DETAILED ACTION

### *Response to Amendment*

1. This Office Action is in response to Applicant's Response to the Board of Patent Appeals, dated February 24, 2005, in response to USPTO Decision on Appeal dated November 17, 2004.

The cancellation of claims 7 and 11 and the amendments to claims 1 and 8 are sufficient to place the application in a condition for allowance.

### *Allowable Subject Matter*

2. Claims 1-6 and 8-10 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Relative to claim 1, the major difference between the teachings of the prior art of record (USP 6,257,573, Ito et al. and USP 5,675,733, Bassetti) and that of the instant invention is that said prior art of record **does not teach** an apparatus, comprising; means for controlling an avionics display, and means for buffering input data received from a data source provided to said controlling means; said controlling means being adapted to provide a modulated row driving signal to the display, wherein at least one frequency component of the modulated row driving signal is attenuated by the modulation such that emanated electromagnetic emissions are reduced, wherein the modulated row driving signal has a different period for one row than for another row.

Regarding claim 8 the major difference between the teachings of the said prior art of record

Art Unit: 2673

and that of the instant invention is that said prior art of record **does not teach** an apparatus, comprising; means for controlling an avionics display; and means for providing input data to be displayed in the display to said controlling means; said controlling means being adapted to provide a modulated row driving signal to the display wherein at least one frequency component of the modulated row driving signal is attenuated by the modulation such that emanated electromagnetic emissions are reduced, said input data providing means being adapted to provide a modulated input data signal to said controlling means to accommodate the modulated row driving signal provided by said controlling means to the display, the modulated row driving signal having a first period for a first row, and a second period for a second row.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
